| Team ID | PNT2022TMID11763 | |
| Project Name | Project - Gas Leakage Monitoring and Alerting | |
| | System | |
| Maximum Marks | 2 Marks | |

Proposed Solution Template:

Project team shall fill the following information in proposed solution template.

| S.No. | Parameter | Description |
|-------|--|---|
| 1. | Problem Statement (Problem to be solved) | Gas leakage monitoring and alerting system |
| 2. | Idea / Solution description | Use IoT to build an LPG gas detecting system |
| 3. | Novelty / Uniqueness | Low cost, high accuracy, easy to use |
| 4. | Social Impact / Customer Satisfaction | Customer would feel safe working in an environment with gas cylinders |
| 5. | Business Model (Revenue Model) | The device would be low cost and effective. Should be advertised well. |
| 6. | Scalability of the Solution | First the Solution should work for the intended purpose of detecting LPG gas in household areas. It can then be scaled to other gases and industry level detection. |
